

## OPEN. ROBUST. EASY TO USE.

Capture up to four sources simultaneously creating rich, multi-perspective video on an open platform with back-to-back recording, rich streaming, and centralized control - all in 1080p High Definition

**Multi-Source Capture:** record up to six HD video sources concurrently

**Live Streaming:** deliver a live broadcast while concurrently recording

**Encoding:** high quality 1080p/60fps recordings encoded in H265/AAC

**No Waiting:** recordings are fully encoded and uploaded when complete

**Automation:** smart work-flow templates to automate recording, streaming, and uploading

**Dynamic Scheduling:** API and iCal integration

**Quick Editing:** non-destructive video clipper for fast post-capture editing

**Local Storage:** store 100's of HD recordings locally for review and edit

**Simple One-Touch Recording:** room control integrations with Crestron and AMX

**Customization:** extend using developer friendly RESTful API service & web-hook integration
